QUERY FORM.

On examination of the return of observations made at Asfordby Hill 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your rainfall return with those of neighbouring stations suggests that omissions have occurred on Apr 5-6 and May 29. as shown below

	Apr 5-6	May 29
Melton Mowbray	·44	·18
Asfordby Hill	-	-
Asfordby Vicarage	·26	·20
Hoby	·23	·24

If you have no reason to the contrary we would recommend that ·25 and ·20 inch respectively be adopted making the totals for April 1·01 May 2.13 and the year 19.43 inches.

We should be glad of your comments on these points.

H. C. Carter
6.7.26.

REPLY.

We find that we have no figures for these two days in our book, so shall adopt the figures you recommend.

Dickinson.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

QUERY FORM.

On examination of the return of observations made at Barrow upon Soar 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.

A comparison of your 1925 rainfall return with those of neighbouring stations suggests that omissions have occurred on November 7th & 29th as shown below

	Nov 7th	Nov 29
Mountsorrel	·26	·14
Barrow upon Soar	–	–
Loughborough	·32	·22

If you have no reason to the contrary we would recommend that values of ·30 and ·20 inch respectively be adopted making the total for the month 1·88 and for the year 24·62 inches

We should be glad of your comments on these points.

H. C. Carter

REPLY.

I have interviewed my very trusty gardener who attends to the gage & he says no rain fell on Nov. 7. or 29.

Surely you are aware that distances of 2 & 4 miles continually show a difference of rainfall - Indeed that very morning it poured here, but at the Quorn Kennels about ½ mile away there was not a drop!

If you are going to "fake" my careful & true return I shall discontinue reporting as it is an absurdity to alter actual rainfall to suit the ideas of compilers of returns.

Bertha Thomson.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

QUERY FORM.

On examination of the return of observations made at Westcotes Drive during 1924 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
On the return sent to this office no entry of rainfall appears against October 21st although other Leicester stations recorded considerably more than 1 inch. Please refer to your original record & say what amount you have entered for this day, or failing any information, if you would agree to (1.20) being adopted making the Oct total 4.56 & the year 28.42 J.S. 28-5-25	I am obliged to you for calling attention to this. The entry under 21 Oct was muddled, but I am able to trace that 1.79 had been pencilled in & this is the correct reading, making the Oct total 4.65 and the year 28.51 Chas Modlen

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.

For use in M.O. 3.

1. The amendments indicated in red ink are adopted Cw
2. Necessary corrections made in Monthly Return
3. " " " " Weekly (Form 3110)

A.M. Form 906.

AIR MINISTRY, METEOROLOGICAL OFFICE.

SOUTH KENSINGTON, LONDON, S.W. 7.

QUERY FORM.

On examination of the return of observations made at Loughborough Sewage Farm 1925 the following queries arise by comparison of the readings with the charts, &c. The Director will be obliged if the book containing the original observations may be referred to and this paper returned, with the required information, as soon as possible.

QUERY.	REPLY.
A comparison of your rainfall return with those of neighbouring stations suggests that an omission has occurred on February 28 as shown below Loughborough Widenings ·18 -do- Sewage Farm – Burton Hall ·18 Prestwold Hall ·19 If you have no reason to the contrary we would recommend that ·20 inch be adopted making the total for the month 2·59 ins and for the year 23·72 inches We should be glad of your comments on this point. H. G. Carter 6.7.26.	I have made careful enquiries into the matter herein, having examined the original diary and entries, and after careful consideration I have come to the conclusion that our return for the date given is correct. I therefore do not see any necessity for altering the record. The other readings you give are generally to the south of our position. What are the readings for positions north of the point? R.M. Walsh. Waterworks Engineer. 9/7/26. Accept — H.R.b. 10.7.26.

N.B.—This paper should be folded so as to bring the printed address outside, and returned immediately. Sealing is unnecessary and defaces or causes a gap in the paper, which is to be filed in the Meteorological Office.
